

FALAK NAZ

Machine Learning Engineering Intern | Computer Science Undergraduate

Karachi, Pakistan | +92-310-2909433 | itsfalaknaz@gmail.com | [Falak Naz | LinkedIn](#)

SUMMARY

Machine Learning Engineering Intern and Computer Science undergraduate at NED University of Engineering and Technology, focused on ML, AI, and Data Science. Experience applying Python to statistical analysis, data visualization, and model training on real datasets, plus four end-to-end academic projects spanning SQL-based systems, game development, and full-stack AI applications. Completed data-analytics and software-engineering internships/simulations with Deloitte, Electronic Arts, and DevelopersHub.

SKILLS

Machine Learning / AI: Python, machine learning fundamentals, model training, statistical data analysis, working with datasets, data visualization, Google Gemini API — applied at FlyRank, DevelopersHub, and in the Auralis AI project below

Languages & Tools: Python, C, C++, Java, JavaScript, HTML, CSS, SQL, Git/GitHub, MS Office, Canva

Web & Systems: Next.js, React, Tailwind CSS, Clerk Authentication, database management (SQL), object-oriented design — applied across the projects below

EXPERIENCE

ML Engineering Intern — FlyRank (AI Internship Program)*June 2026 – Present*

- Joined FlyRank's AI Internship Program as a Machine Learning Engineering Intern, applying Python and machine learning fundamentals to organic-growth and content/SEO tooling.

Data Science & Analytics Intern — DevelopersHub Corporation*April 2026 – June 2026*

- Used Python and statistical data analysis to work with real-world datasets, uncovering trends and translating them into business-facing recommendations.
- Performed model training and data visualization as part of the analytics workflow, working to bridge raw datasets and corporate decision-making.

Data Analytics Job Simulation — Deloitte Australia (via Forage)*April 2026*

- Completed a forensic-technology and data-analysis simulation working with structured datasets; built a data dashboard in Tableau and used Excel to classify data and support business conclusions.

Software Engineering Virtual Experience — Electronic Arts (via Forage)*March 2026*

- Proposed a new feature for EA Sports College Football and wrote a feature-proposal document for stakeholder review.
- Designed a class diagram and implemented a C++ header file defining classes for the proposed feature.
- Patched a bug and optimized the codebase by implementing an improved data structure.

PROJECTS

Auralis AI — AI Learning Workspace — Personal project*July 2026*

- Built and shipped a working AI-powered learning platform using Next.js, React, Tailwind CSS, Clerk Authentication, and the Google Gemini API.
- Delivered a functional product with AI chat, a "Study Mesh" feature, student profiles, a dashboard, a leaderboard, and a responsive UI.

Emergency Resource Management System — Team lead — academic project*May 2026*

- Designed and led a team to build a SQL-based system to track critical supplies and coordinate personnel during disaster-response scenarios.
- Implemented core DBMS concepts (schema design, queries) to manage structured datasets for real-time supply tracking.

Math Clash — Team lead — academic project*November 2025*

- Led a team to build a competitive math game applying core data structures and algorithms.
- Delivered user authentication, a scoring system, a progress dashboard, and a leaderboard as completed, working features.

Health Recommendation System — Co-lead — academic project*May 2025*

- Co-led development of a modular, scalable C++ system applying object-oriented design to generate personalized diet and exercise plans.

- Built user authentication, input validation, and a recommendation engine as completed components of the shipped system.

EDUCATION

Bachelor of Computer Science & Information Technology — NED University of Engineering and Technology, Karachi *Aug 2024 – Aug 2028*

Intermediate — Saint Lawrence Government Girls Degree College, Karachi *Mar 2021 – Jun 2023*

CERTIFICATIONS & COURSES

- Structured Query Language — Coursera
- Artificial Intelligence Course — AI Institute of Pakistan
- Intro to Programming — Kaggle
- Google AI — Coursera
- Web Developer — BanoQabil
- Python for Data Science — IBM SkillsBuild

LEADERSHIP & VOLUNTEER EXPERIENCE

Graphic Designer & Marketing Lead — NSA Society, NED University *2024 – 2026*

- Designed visuals and promotional material for society events and supported the organization's public presence.
- Led marketing and social-media promotions, supervised 3 volunteers, and prepared semester-wise performance reports.

AWARDS & SCHOLARSHIPS

- Jauhar merit-based academic scholarship — NED University of Engineering and Technology (2024–2026)
- Merit-based Laptop Award — Prime Minister's Youth Laptop Scheme (2024–2026)

LANGUAGES

English, Urdu
